

PetSaver Training

The PetSaver Program is an eight hour course that will cover pet CPR and valuable first aid skills and information to help pet owners keep their pets happy and healthy. Additionally, the class includes the PetSaver handbook, and upon successful completion each participant will receive a certificate.

Every pet owner and pet care professional should be trained in these life saving skills!

Day 3

PetTech Instructor Training

The Pet Tech Instructor Training is a comprehensive, three-day, interactive program. Instructors will learn the necessary skills and teaching methods to properly train pet owners in CPR, first aid and care. This course will include competent training in the identification and evaluation of the signs and symptoms a pet may develop and the appropriate actions to be taken for proper emergency medical treatment.

As a Pet Tech Instructor, you can provide a much needed service for dog and cat owners, be part of a fun and growing industry and generate revenue for your existing business. We have several Instructors that are human CPR & First Aid Instructors, pet sitters, groomers, vet staff and obedience trainers and our program is ideal for their clients and other pet owners in the community.
